

SEC, Inc.

SITE ENGINEERING CONSULTANTS

Civil Engineering · Land Surveying · Land Planning · Landscape Architecture

Educational

The educational sector has provided SEC, Inc. with a consistent share of the work. Our experience in this area, combined with our diverse background in the basics of civil engineering design, creates a strong foundation which allows us to deliver your projects professionally and in a timely manner. We enjoy the team atmosphere it takes to bring these projects together for our clients.

We take the project from concept through construction by providing the various elements necessary in the process. SEC, Inc. has in-house surveying services and provides boundary and topographic surveys, ALTA-ACSM surveys, control surveys, and construction staking services.

SEC also provides conceptual master planning services. Our typical civil design includes the site plan, water and sewer plans, and grading, drainage and erosion control plan. Our designs are supplemented by construction details and specifications. Our project engineers coordinate all aspects of the design with the architectural, MEP, and landscape architectural consultants, as well as the reviewing departments and agencies.

SEC, Inc. designs educational facilities for local departments of education, community colleges, junior colleges, technology centers and state universities. We have provided topographic surveys for site designs, campus-wide control surveys, and construction staking surveys.

Past educational projects include:

- Administration Buildings
- Bus Shops
- Classroom Buildings
- Convocation Arenas
- Dormitories
- Fitness Centers
- Parking Lots
- Performing Arts Building
- Walking Trails

We are diligent on our clients' behalf to provide accurate and quality services in all phases of the work. Due to this we are able to enjoy lasting relationships with our clients.

Representative Educational Projects Include:
