

SEC, Inc.

SITE ENGINEERING CONSULTANTS

Civil Engineering · Land Surveying · Land Planning · Landscape Architecture

Healthcare

SEC has consistently provided design services in the healthcare segment. We have a wide level of experience in this area, which leads us to various cities and states. Due to the varying nature of medical and psychiatric projects, they allow us the ability to exercise the basics of our civil engineering knowledge and creativity. We not only enjoy these wide variety of projects, but also serving the various clients needs.

SEC provides conceptual site plans and master planning for many of our projects. SEC, Inc. provides in-house surveying services as well. We perform boundary and topographic surveys, ALTA-ACSM surveys, LOMA/LOMR submittals, control surveys, and construction staking services. This complements SEC as a full-service civil firm.

Our typical healthcare designs include site layout, water and sewer main, grading, drainage and erosion control, and stormwater handling designs. Our designs are supplemented by construction details and specifications.

A successful healthcare project is one that is completed under budget and on schedule. SEC prides itself on doing both as a member of a multi-disciplinary professional team, a design-build construction team or providing stand-alone civil engineering services.

We enjoy the uniqueness that each project presents. We are constantly being challenged to plan projects within design and economic constraints. Over our 30 years in existence, we have learned the importance that

Our typical healthcare projects include:

- Medical Hospitals
- Medical Clinics
- Medical Office Buildings
- Psychiatric Hospitals
- Crisis Intervention Centers
- Group Homes
